Pools of pleasure

Get ready for summer with a plush pool at your very own place. We have an option ready

ISHITA SHARMA
featuresdelhi@mid-day.com

There's nothing like surrendering yourself to sparkling waters on a scorching summer day. Yeah, we know, it's only February, but it's not going to be long before the fiery sun comes charging. A new Brit brand — Technology Pools — is offering cool pool designs for your home, and we thought you might just want to know.

Making a splash

The concept, called Technology Plus, offers a host of services for building up customised pools. There are saunas, spas and steam rooms to go with your home décor. This apart, you can also get your waterhole designed in corporate houses, hotels and homes.

These use graphic imaging solutions

like 3-D Max to prepare realistic swimming pool renderings for you to view, and get an idea of how the pool will look like, before you make up your mind.

Multitask while you bask

There is the movable swimming pool which, at the touch of a button, fully adjusts to any water depth or even empties itself, thus turning into a dance floor! Then, the Hydrotherapy Pool offers treatment for arthritis and back pain. You can also pick from the Glass Wall Swimming Pool or Deck Level Swimming Pools. Finally, there are also the Indoor, Outdoor and Stainless Steel pools which are rock solid, and will not fade or rust.

Clean and clear

Technology Pools also offers a service to install an automatic in-floor pool clean-

ing system, which is engineered to clean the entire pool including floors, steps, benches, even spas. A range of self cleaning pools are also available.

Safety, of course, is something you must keep in mind, says Hemant Atrish, chief technology officer of the firm. "Every year, a number of swimming accidents occur. In most of the cases it is the children that are most affected. Barriers around the pool are a must. Fences and walls should be at least of 4-feet high and installed completely around the pool. The swimming pool gates should be self closing and self-latching." Samjhe?
