Ultra Level Infinity Swimming Pools from Technology Pools

Technology Pools*, a luxury swimming pool design, consultancy and installation company, has launched an ultra-level infinity swimming pool concept which offers the experience of a health-resort lifestyle at home. These pools have a minuscule basin surrounding the perimeter, which catches the water when it falls over the side. This gives an impression that the pool is without any edge. From there the water is pumped through a secondary filtration system back into the pool. These pools come in a variety of standard shapes and sizes and can be further customised. They can be built on cliffs and hills or even in a sloping garden.
